DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over
Chem Abstract 136: 200547 or 135: 107664.

136: 200547 discloses poly(3,4-ethylenedioxythiophene), PEDOT_h(Ni), and its hexyl derivative, PEDOT_h-C₆ (Ni), have been prepared by organometallic dehalogenation polycondensation of 2,5-dichloro-3,4-ethylenedioxythiophene and its hexyl derivative with a zerovalent nickel complex in organic solvents.

The reference further discloses the product in the form of repeating unit derived from the claimed monomer which is 2,5-dihalothiophene.

135: 107664 discloses that oligo(3,4-ethylenedioxythiophene)s are synthesized via polycondensation of the dibromo monomer in the presence of NiBr₂ (bpy) catalyst in organic solvent such as N,N-dimethylacetamide.

The reference further discloses the product in the form of repeating unit derived from the claimed monomer which is 2,5-dihalothiophene.

The disclosures of the references differ from the instant claims in that they do not disclose the claimed acid catalyst with specific components.

Art Unit: 1711

However, they do disclose the use of a nickel complex having the same functionality with the claimed acid catalyst. Therefore, it would have been obvious to one of ordinary skill in the art to select the nickel complex from the reference to replace the claimed acid catalyst since they have been shown to be effective in a similar system and thus would have been expected to provide adequate results. There is no showing of unexpected results derived from said selection.

Claim 6-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "the solvent" in line 2. There is insufficient antecedent basis for this limitation in the claim.
